

# Specialist in psychiatric and neurological disorders

*Non-Clinical Safety Research brings value to patients and Lundbeck by ensuring that new therapeutic drug candidates are safe for healthy volunteers and patients to use. We apply high scientific standards, efficiency and quality in the conduct of non-clinical studies that form basis for safety assessment in the development of new treatments of brain disease*

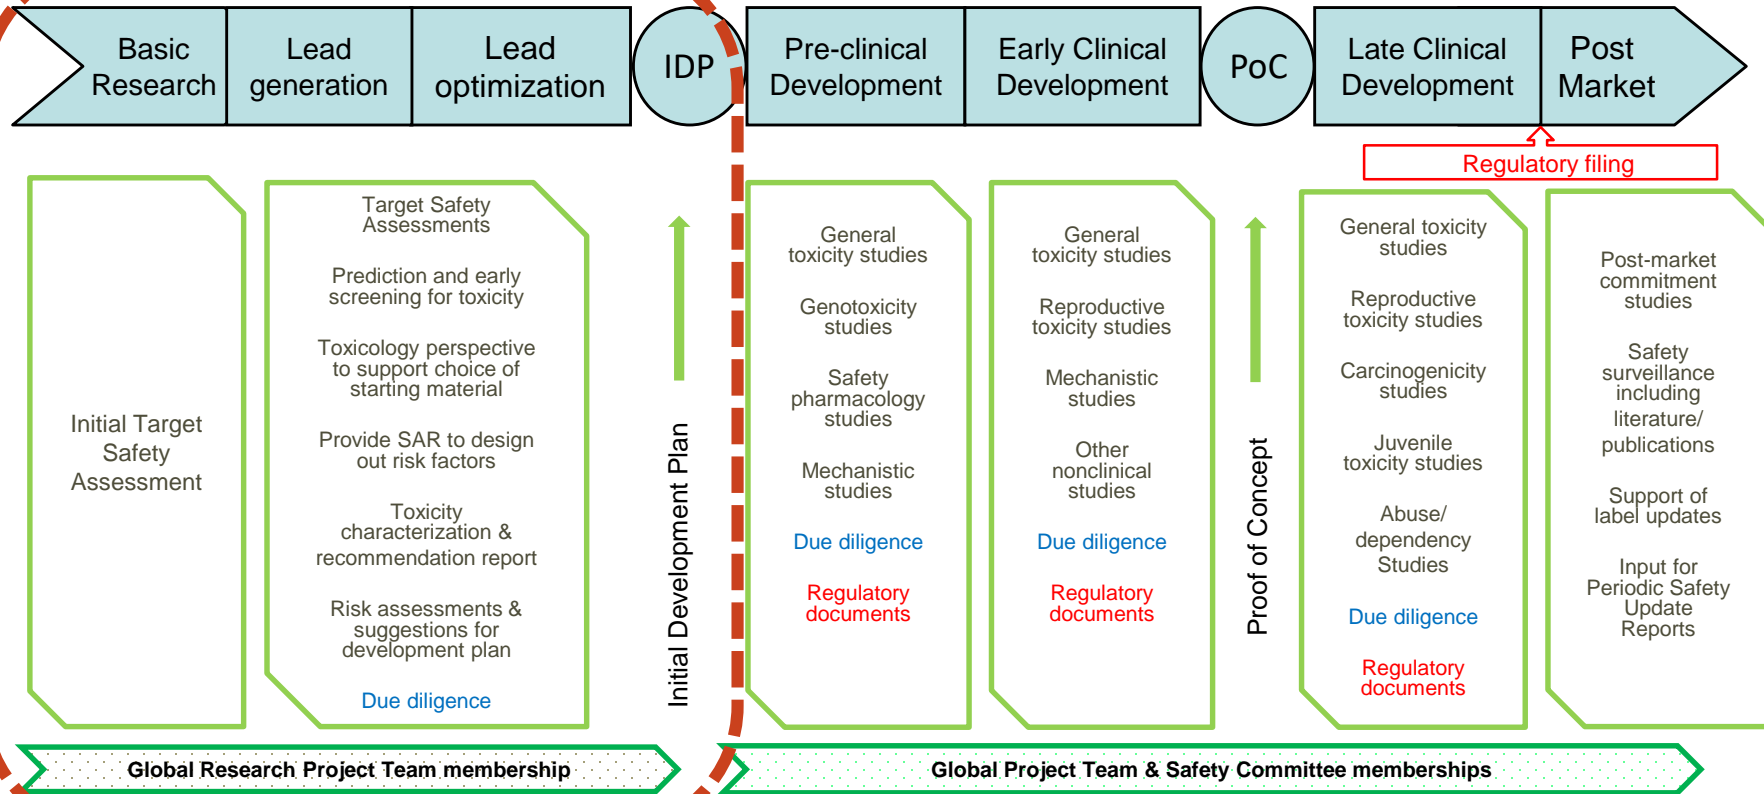

**DSTF/BCPT MEETING APRIL 2022, UCPH**

*Karina Bernholm & Allan Dahl Rasmussen  
H. Lundbeck A/S*

# At Lundbeck toxicologists support the entire development value chain

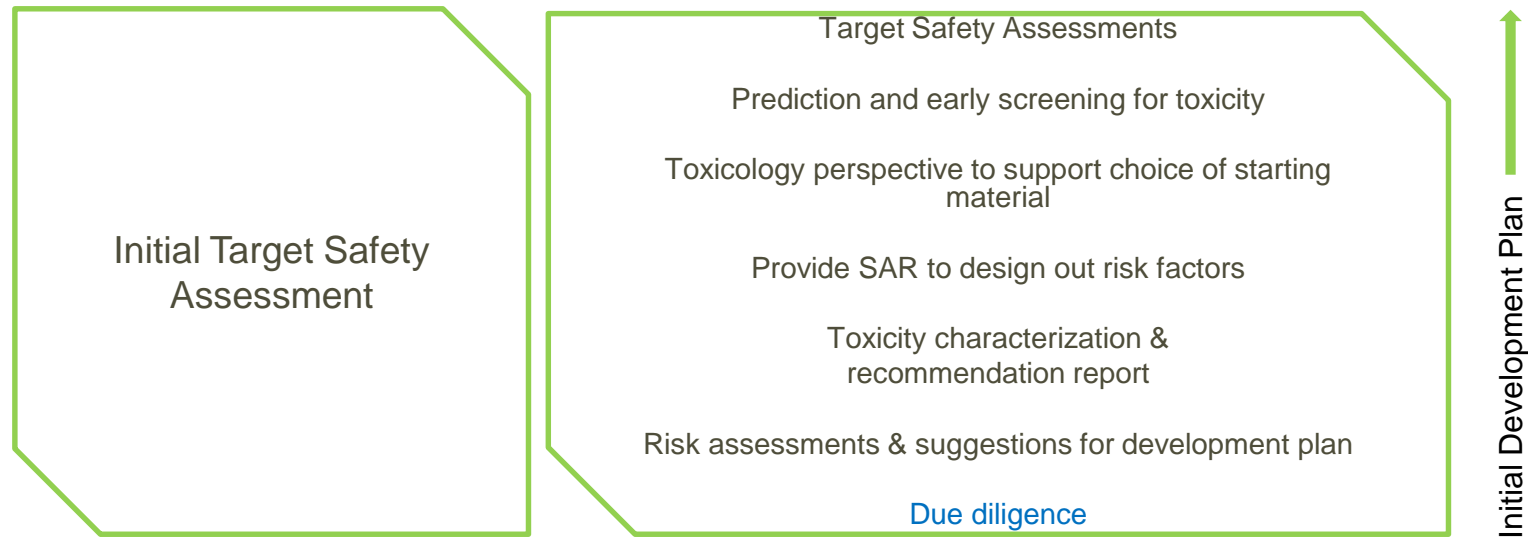

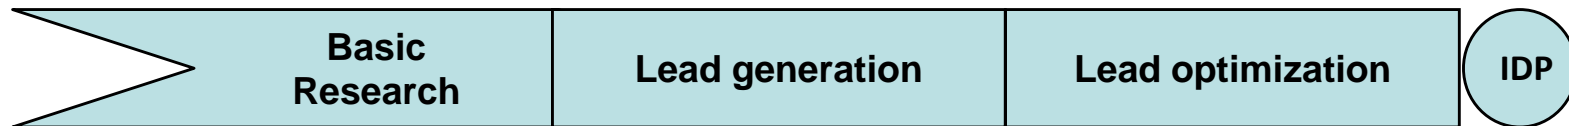

*Our measure of success lies in interactions with regulatory authorities, mainly as written documents containing sound safety assessments allowing for clinical trials and ultimately successful marketing applications*

**Due diligence** is the process of appraising a drug being developed by another company to decide on whether to invest in that drug – our part of the appraisal has focus on the toxicological aspects

# At Lundbeck, toxicologists support the entire development value chain

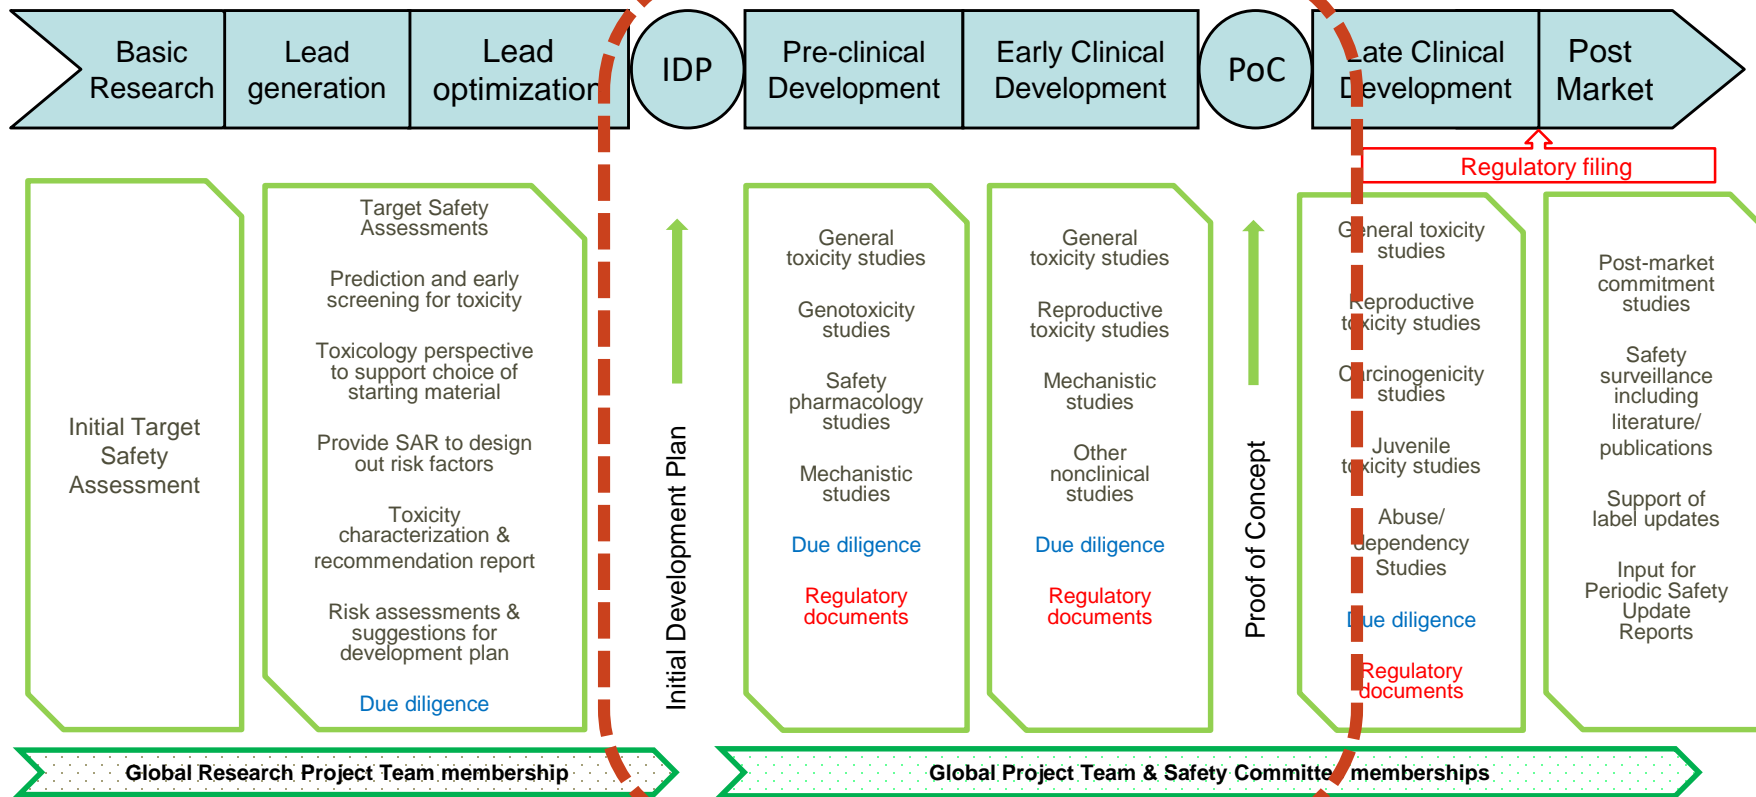

**Global Research Project Team membership**

*Our measure of success lies in interactions with regulatory authorities, mainly as written documents containing sound safety assessments allowing for clinical trials and ultimately successful marketing applications*
